- raw glycerin upgrading
- 30-40% glycerin in Natural Gas reformer, ~150 kton/y bio-methanol (~150 MW_{bio-methanol})
- Looking for options to go to 100% bio-methanol: gasification

Stora Enso / Neste Oil Joint Venture for FT BTL Diesel Fuel

50/50 Joint Venture “NSE Biofuels Oy” to first develop technology and later produce next generation renewable diesel crude from wood / forest residues

Currently building a 12MW demonstration plant in Stora Enso’s Varkaus mill, to be in use spring 2009

Investment decision for a commercial scale plant when the parties have enough experience from the demonstration plant

Outlook: usage as synthesis gas

Summary

- Work on gasification of biomass is going on
- Political frame conditions are good, but there is the trend to electric cars
- Several Demoplants are on the way!
