

Together.
Smarter.

North Sea Port

North Sea Port

Riding the regulatory wave

Sophie Delannoy - Program Manager Sustainable Transport fuels

Wavemaker: Where Passion Meets Purpose

- Sustainable Transport Fuels Program
- Port Readiness Marine Fuels
- CO2 emissions reduction roadmap shipping
- Electrification where possible

European top tier port in the world

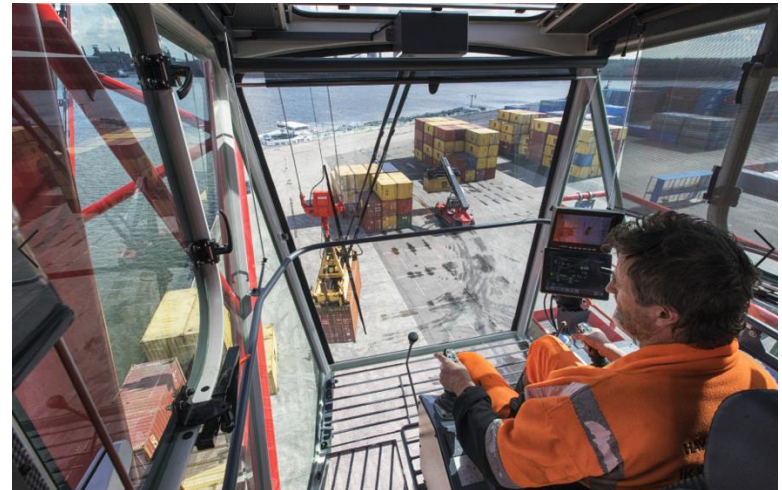

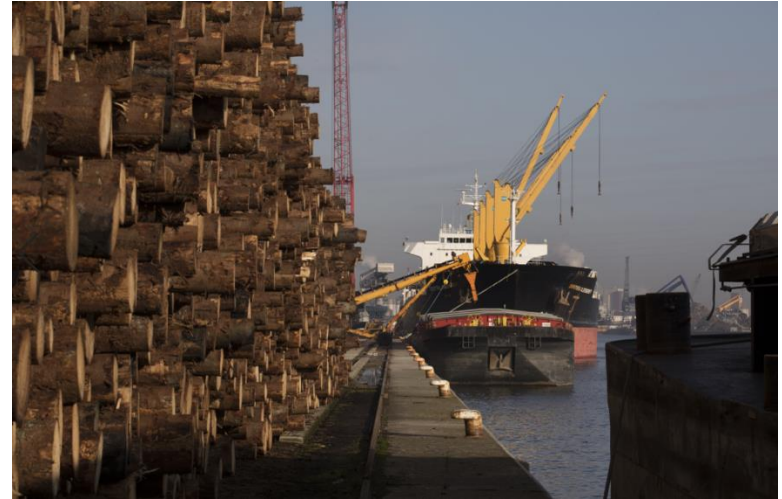

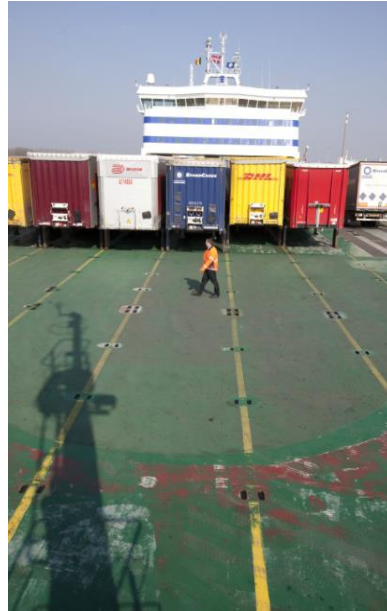

Central in Europe
60 km from Vlissingen to Ghent

Gateway to Europe

A unique & versatile port, covering all segments

Navigating the landscape

Big deal or not?

Regulatory uncertainty.

Local patchwork.

Fossil lock-in.

Largest INTEGRATED production site for biorefinery and energy in Europe

Transition to advanced biofuels

oleon
a natural chemistry

FUJI OIL EUROPE

DOW

YARA

LanzaTech

ArcelorMittal

ENGIE

Industrial symbiosis through CROSS BORDER chemical, food & syngas cluster

- Syngas & H2 -> e-fuels
- CCU -> methanol
- Ammonia potential

Steering a Smart & Wide course

Strategic plan 'IMPACT 2030':

Reducing CO₂ emissions: -55% by 2030 -0% by 2050
10% zero-emission fuels in shipping ops by 2030

Gradual & adaptive transition

Incl. bio-based fuels, electrification, ammonia and methanol

Green Shipping Corridors

On shore power supply

The tide won't wait!

Let's be the current that carries shipping to zero

From no-regret available solutions

To zero-emission fuels

Through collaboration
